At last there has been patented a Riding Cultivator that Cultivates.

We heard of it and bought it. It has six showels, three on each beam. These beams are carried by an immense oil spring, leaving the showels flexible, so flex libe that by unerely inclining his foot the operator can accurately follow a corr row, plowing right up to the plant. If you see it you will buy it. We have the largest line of Riding and Waking Cultivators in the Ohio Yalley, and it cost you nothing to look at them.

### DISC HARROWS as Low as \$15.

We buy Disc Harrows in carload tots, taking advantage of car prices. Then we discount the bill. We can save you money on Disc Harrows sure. Work on the level, leave a clean furrow behind you, so that the seed of a good example will properly prosper. This can best be done by using Belle's Center Cut Disc Harrows. They have thirteen discs, six in one gang and seven in the other, thus cutting out all the center. They leave no hard ridge in the center of the furrow where seed won't grow, as other harrows do. One gaug is pseuliarly hong behind the other in such a manner as to level up the ground instead of throwing it all away from the center as others do. This peculiarly is patented and last year occasioned twenty-seven law suits. It's a good thing, and every-one's after it. You will be after it too if you ever see one at work. Our business is Disc Harrows—we are right at home there. Come see ins.
